1	07-Sep-2026	Home Page	Card Content Alignment Issue in "Today's Pickup" Section	The content inside the "Today's Pickup" card is not properly aligned. The t-shirt icon, service details, and status section appear visually unbalanced, affecting the overall UI consistency.	1.Open Freshfold-Laundry application. 2.Navigate to the Home page. 3.Scroll to the "Today's Pickup" section. 4.Observe the alignment of the card elements.	All card elements (icon, service name, price, and status) should be properly aligned and spaced according to the design layout.	The "Today's Pickup" heading is not aligned properly with the card layout and content below it.	Chrome / Windows	Fixed	Developer	Screenshot 2026-09-07 0412	Nishu
2	07/09/26	Book a Pickup Form	Full Name Field Accepts Numeric Values	The "Full Name" field accepts numeric values. Users can enter only numbers without receiving any validation message. The field should allow only alphabetic characters and valid name formats.	1.Open the Book a Pickup form. 2.In the "Full Name" field, enter numeric values (e.g., 963852471). 3.Fill the remaining mandatory fields. 4.Submit the form.	The system should display a validation message such as "Please enter a valid name" and prevent form submission when numeric values are entered in the Full Name field.	The Full Name field accepts numeric values without showing any validation error.	Chrome / Windows	Fixed	Developer	Screenshot 2026-09-07 0426	Nishu
3	07/09/26	Book a Pickup Form	Mobile Number Field Does Not Restrict Input Length to 10 Digits	The Mobile Number field does not enforce the standard Indian mobile number length requirement. Users can enter more or fewer than 10 digits without receiving a validation error.	1.Open the Book a Pickup form. 2.Enter a mobile number with less than 10 digits (e.g., 741258963). 3.Enter a mobile number with more than 10 digits (e.g., 7412589630123). 4.Submit the form.	The Mobile Number field should: 1.Accept only numeric values. 2.Restrict input to exactly 10 digits. 3.Display a validation message if the number is less than or greater than 10 digits.	The Mobile Number field accepts invalid lengths without displaying any validation error.	Chrome / Windows	Fixed	Developer	Screenshot 2026-09-07 0426	Nishu
4	07/09/26	Ready for Laundry Dry Section	Start Booking Button Does Not Have Hover Effect	The "Start Booking" button does not display any hover effect when the user moves the mouse pointer over it. This results in a poor user experience and provides no visual indication that the button is interactive.	1.Open the Freshfold-Laundry website. 2.Navigate to the "Ready for Laundry Dry" section. 3.Hover the mouse cursor over the "Start Booking" button. 4.Observe the button behavior.	The button should display a hover effect (e.g., color change, shadow, border change, or animation) to indicate that it is clickable.	No hover effect is displayed when hovering over the button.	Chrome / Windows	Fixed	Developer	Screenshot 2026-09-07 0444	Nishu
5	07/09/26	Home Page	Same Card Content Alignment Issue in “Today’s Pickup” Section – Mobile View	In the mobile view, the content within the cards in the “Today’s Pickup” section is not properly aligned, resulting in an inconsistent and uneven layout.	1.Open Freshfold-Laundry application. 2.Navigate to the Home page. 3.Scroll to the "Today's Pickup" section. 4.Observe the alignment of the card elements	All card content should be properly aligned with consistent spacing and positioning in the mobile view.	The card content appears misaligned in the mobile view, affecting the overall visual consistency of the section.	Mobile View	Fixed	Developer	Screenshot 2026-09-07 0448	Shivani
6	07/09/26	Every Page	Three-Dot Menu Does Not Close After Navigation – Mobile View	In the mobile view, when the user clicks on the three-dot menu and selects an option to navigate to another page/section, the page navigates successfully, but the three-dot menu panel remains open instead of closing automatically.	1.Open the website in mobile view. 2.Click on the three-dot menu. 3.Select any navigation option to move to another page.4.	After selecting an option from the three-dot menu, the menu panel should automatically close once navigation occurs.	The page navigates successfully, but the three-dot menu panel remains open.	Mobile View	Fixed	Developer	Screenshot 2026-09-07 0451	Nishu
7	07/09/26	Every Page	“FreshFold” Website Name Shakes on Repeated Three-Dot Menu Clicks – Mobile View	In the mobile view, when the user repeatedly clicks different options in the three-dot menu to navigate between pages, the “FreshFold” website name starts shaking or flickering unexpectedly.	1.Open the website in mobile view. 2.Click on the three-dot menu. 3.Select any navigation option to move to another page. 4.Repeat the process by clicking different options multiple times. 5.Observe the “FreshFold” website name.	The “FreshFold” website name should remain stable without any shaking or flickering during navigation.	The “FreshFold” website name starts shaking when different three-dot menu options are clicked repeatedly.	Mobile View	Fixed	Developer	Screen Recording 2026-09-1	Nishu
8	07/09/26	Price Page	Missing Service Pricing Details in Pricing Section	The Services section contains 6 different services with their respective pricing details. However, the Pricing section/page displays pricing for only 3 services, while the remaining 3 services are not available.	1.Open the website. 2.Navigate to the Services section and observe the available services and their prices. 3.Navigate to the Pricing section/page. 4.Compare the services listed in both sections. 5.Observe that only 3 services are displayed in the Pricing section.	All 6 services available in the Services section should also be displayed with their respective pricing details in the Pricing section.	Only 3 services — Steam Ironing, Household Laundry, and Delicate Care — are displayed in the Pricing section, while the other 3 services are missing.	Window/Chrome	Fixed	Developer	Screenshot 2026-09-07 0541	Nishu
9	08/09/26	Contact Page	Approx Quantity field allows alphabetic characters before numeric values	In the "Book a Pickup" section, the "Approx Quantity" field allows users to enter alphabetic characters before entering a numeric value.	1.Open the Book a Pickup section. 2.Navigate to the Approx Quantity field. 3.Enter an alphabetic character first, such as "kg". 4.Observe that the field accepts the alphabetic character before a numeric value.	The input should start with a numeric value, followed by alphabetic characters if required. For example: 5 kg, 10 kg, etc.	The field currently allows alphabetic characters to be entered before the numeric value.	Window/Chrome	Fixed	Developer	Screenshot 2026-09-08 0258	Nishu
10	08/09/26	Every page	Page Content Visible Through “FreshFold” Website Name While Scrolling – Mobile View	In the mobile view, the “FreshFold” website name has a transparent background. When the user scrolls the page, the text/content behind it becomes visible through the “FreshFold” name area.	1.Open the website in mobile view. 2.Navigate to any page. 3.Scroll down the page. 4.Observe the “FreshFold” website name at the top. 5.Continue scrolling and observe the content behind it.	The “FreshFold” website name area should have an appropriate background so that the page content behind it is not visible through it while scrolling.	The page content/text becomes visible through the transparent “FreshFold” website name area while scrolling.	Mobile View	Fixed	Developer	Screenshot 2026-09-08 0410	Nishuu
11	08/09/26	Every page	Page Heading Partially Hidden Behind “FreshFold” Website Name During Navigation – Mobile View	In the mobile view, when navigating from the Home page to another page, the destination page does not start at the correct position. As a result, part of the page heading goes behind the “FreshFold” website name area and becomes partially hidden.	1.Open the website in mobile view. 2.Start from the Home page. 3.Navigate to any other page using the navigation menu. 4.Observe the heading of the destination page.	The destination page should open at the correct top position, with the complete page heading clearly visible below the “FreshFold” website name area.	Part of the destination page heading goes behind the “FreshFold” website name area, causing the heading to be partially hidden.	Mobile view	Fixed	Developer	Screenshot 2026-09-08 0415	Nishuu
12	08/09/26	Home Page	“Today Pickup” Section Border Touches “FreshFold” Website Name Header – Desktop View	In the desktop view, when the website is opened and the user clicks on the “Home” page, the blue border of the “Today Pickup” section appears directly attached to the “FreshFold” website name/header, without proper spacing between them.	1.Open the website on a laptop/desktop. 2.Click on the “Home” option. 3.Observe the “Today Pickup” section. 4.Check the spacing between the “Today Pickup” section and the “FreshFold” website name/header.	There should be proper spacing between the “FreshFold” website name/header and the “Today Pickup” section. The blue border should not touch the website name/header.	The blue border of the “Today Pickup” section appears directly attached to the “FreshFold” website name/header.	Desktop View	Fixed	Developer	Screenshot 2026-09-08 0428	Nishuu
13	09/09/26	Footer Navigation	Incorrect Scroll Position on Footer Navigation Links	Footer navigation links (Services, Pricing, FAQ, Contact) navigate to the correct sections, but the selected section is not positioned correctly at the top of the viewport.	1. Open the website. 2. Scroll to the footer. 3. Click/tap Services, Pricing, FAQ, or Contact. 4. Observe the top of the screen.	The selected section should align properly at the top of the viewport without any previous content being visible.	A portion of the previous section/content remains partially visible at the top after navigation.	Desktop & Mobile View	Fixed	Developer	Screenshot 2026-09-08 2341	Shivani
									Fixed	Developer	Screenshot 2026-09-08 2338	Shivani
14	11/09/26	Today's Pickup Section	Alignment Issue on Screen Rotation (Mobile View)	The Today's Pickup section becomes misaligned when the mobile device is rotated from portrait to landscape mode. The layout does not adjust properly, causing UI inconsistency.	1.Open the FreshFold website on a mobile device. 2.Navigate to the section containing Today's Pickup. 3.Rotate the device from portrait mode to landscape mode. 4.Observe the alignment of the Today's Pickup section.	The Today's Pickup section should remain properly aligned and responsive after screen rotation.	The Today's Pickup section becomes misaligned after screen rotation, causing UI elements to appear improperly positioned.	Mobile (Landscape Mode)	Fixed	Developer	Screenshot 2026-09-11 000131.png	Shivani
15	13/09/26	Header / Navigation	Navigation Items Wrap to Multiple Lines on iPhone 16 view	Navigation menu items are not properly aligned in the iPhone 16 viewport.	1. Open FreshFold website. 2. Set viewport to iPhone 16. 3. Observe the header/navigation bar.	Navigation items and the CTA button should be properly aligned and displayed without unwanted text wrapping.	"How It Works" and "Book a Pickup" wrap into two lines, causing inconsistent navbar alignment and increasing the header height.	iPhone 16 landscape view	Fixed	Developer	Screenshot 2026-09-13 0252	Nishu
